

IN THE SPECIFICATION

Please amend the marked paragraphs in the manner set forth below:

Please amend the paragraph beginning at page 5, line 20, as follows:

In use, the closure arrangement 20 is screwed onto a container by turning the closure arrangement 20 in a normal clockwise direction indicated by arrow 54 so that the thread 52 of the locating member 24 screws onto a thread of the container. The pawls 48 engage with the ratchet wheel protrusions ~~48~~46 to prevent rotation of the dispensing body 22 relative to the locating member 24 and thus allow tightening of the closure arrangement 20 onto the container.
